Contents Volume 158

1 Minimax programming under (p,r)-invexity
T. Antczak
20 Non-discretionary and discretionary factors and scale in data envelopment analysis
M.J. Syrjänen
34 Incorporating kin selection in Simulated Annealing algorithm and its performance evaluation
K.A. Singh, A. Mukherjee and M.K. Tiwari
46 A method for finding the set of non-dominated vectors for multiple objective integer linear programs
J. Sylva and A. Crema
56 Stronger K-tree relaxations for the vehicle routing problem
C. Martinhon, A. Lucena and N. Maculan
72 Production and inter-facility transportation scheduling for a process industry
R. de Matta and T. Miller
89 Production scheduling in a flexible manufacturing system under random demand
M. Sharafali, H.C. Co and M. Goh
103 Supply chain modelling of forest fuel
H. Gunnarsson, M. Rönnqvist and J.T. Lundgren
124 Using neural networks and cognitive mapping in scenario analysis: The case of Turkey's inflation dynamics
Ş. Önsel Şahin, F. Ülengin and B. Ülengin
146 Scenario networks to align and specify strategic information systems: A case-based study
J. Powell and P. Powell
173 Determining the optimal direct mailing frequency
N. Piersma and J.-J. Jonker
183 Designing robust emergency medical service via stochastic programming
P. Beraldi, M.E. Bruni and D. Conforti
194 Interactive multiobjective agro-ecological land use planning: The Bungoma region in Kenya
P.J. Agrell, A. Stam and G.W. Fischer
218 Application of fuzzy optimization to diet problems in Argentinean farms
J.M. Cadenas, D.A. Pelta, H.R. Pelta and J.L. Verdegay
229 A new foundation for the mean–variance analysis
L. Liu
243 Emissions trading and technology deployment in an energy-systems "bottom-up" model with technology learning
L. Barreto and S. Kypreos
262 A note on two direct methods in linear programming
W. Li

doi:10.1016/S0377-2217(04)00174-2

doi:10.1016/S0377-2217(04)00174-2

267 Editorial: Methodological foundations of multi-criteria decision making
W. Ogryczak and R. Vetschera
271 Axiomatic characterization of a general utility function and its particular cases in terms of conjoint measurement and rough-set decision rules
S. Greco, B. Matarazzo and R. Słowiński
293 Out of the mist—towards decision-maker-friendly multiple criteria decision making support
I. Kaliszewski
308 Phased multicriteria preference finding
C.M. Brugha
317 Integration of ordinal and cardinal information in multi-criteria ranking with imperfect compensation
E. Hinloopen, P. Nijkamp and P. Rietveld
339 Preference and veto thresholds in multicriteria analysis based on stochastic dominance
M. Nowak
351 A method for dealing with inconsistencies in pairwise comparisons
J. González-Pachón and C. Romero
362 Equitable aggregations and multiple criteria analysis
M.M. Kostreva, W. Ogryczak and A. Wierzbicki
378 A multicriteria classification approach based on pairwise comparisons
M. Doumpos and C. Zopounidis
390 Towards multicriteria clustering: An extension of the k-means algorithm
Y. De Smet and L. Montano Guzmán
399 Multi-criteria minimum cost spanning tree games
F.R. Fernández, M.A. Hinojosa and J. Puerto
409 Unified approaches for solvable and unsolvable linear complementarity problems
M.M. Kostreva and X.Q. Yang
418 On the computational efficiency of multiple objective metaheuristics. The knapsack problem case study
A. Jaszkiewicz
434 Some constrained partitioning problems and majorization
G. Dahl and T. Flatberg
444 Exponential smoothing models: Means and variances for lead-time demand
R.D. Snyder, A.B. Koehler, R.J. Hyndman and J.K. Ord
456 A multi-product continuous review inventory system with stochastic demand, backorders, and a budget constraint
B. Ghalebsaz-Jeddi, B.C. Shultes and R. Haji
470 Machine scheduling with job delivery coordination
Y.-C. Chang and C.-Y. Lee
488 Optimal reorder point inventory models with variable lead time and backorder discount considerations
J.C.-H. Pan, M.-C. Lo and Y.-C. Hsiao
506 k-Sided permutation games and multiprices of equilibrium
N. Auriol and E. Marchi
518 Estimating the city-block two-dimensional scaling model with simulated annealing
P.L. Leung and K.-n. Lau
525 A note on the single machine serial batching scheduling problem to minimize maximum lateness with identical processing times
J.J. Yuan, A.F. Yang and T.C.E. Cheng

529 A note on C_{pk} index estimation using fuzzy numbers
D.H. Hong

533 Modeling staff scheduling problems. A tutorial
I. Blöchliger
543 Recyclable waste collection planning—a case study
J. Teixeira, A. Pais Antunes and J. Pinho de Sousa
555 ATM VP-based network design
J. Kang, K. Park and S. Park
570 The computational complexity of the relative robust shortest path problem with interval data
P. Zieliński
577 The scheduling problem of PCBs for multiple non-identical parallel machines
N. Van Hop and N.N. Nagarur
595 A Branch-and-Bound procedure to minimize total tardiness on one machine with arbitrary release dates
P. Baptiste, J. Carlier and A. Jouglet
609 Single period, single product newsvendor model with random supply shock
K. Liu, J.-A. Li and K.K. Lai
626 The optimal and heuristic solutions of a distribution network
H.M. Wee and P.C. Yang
633 Stochastic approach versus multiobjective approach for obtaining efficient solutions in stochastic multiobjective programming problems
R. Caballero, E. Cerdá, M. del Mar Muñoz and L. Rey
649 Statistical performance of a multiclass bulk production queueing system
C. Armero and D. Conesa
662 Social multi-criteria evaluation: Methodological foundations and operational consequences
G. Munda
678 Stability on multiobjective dynamic programming problems with fuzzy parameters in the objective functions and in the constraints
D. Li and C. Cheng
697 Multiple criteria decision making with generalized DEA and an aspiration level method
Y.B. Yun, H. Nakayama and M. Arakawa
707 Simple and absolute special majorities generated by OWA operators
B. Llamazares
721 Rank-based modelling of preferences in multi-criteria decision making
P. Leskinen, A.S. Kangas and J. Kangas
734 Assessing non-additive utility for multicriteria decision aid
S. Angilella, S. Greco, F. Lamantia and B. Matarazzo
745 Interval priorities in AHP by interval regression analysis
K. Sugihara, H. Ishii and H. Tanaka
755 Degree of scale economies and congestion: A unified DEA approach
K. Tone and B.K. Sahoo
773 The design of a dynamic allocation mechanism for the federal energy assistance program LIHEAP
M.J. Kaiser and A.G. Pulsipher
793 A note on the lifted Miller–Tucker–Zemlin subtour elimination constraints for the capacitated vehicle routing problem
I. Kara, G. Laporte and T. Bektas
796 Contents Volume 158
